and set you up for future growth.

Planning for Digital Signage

What is involved?

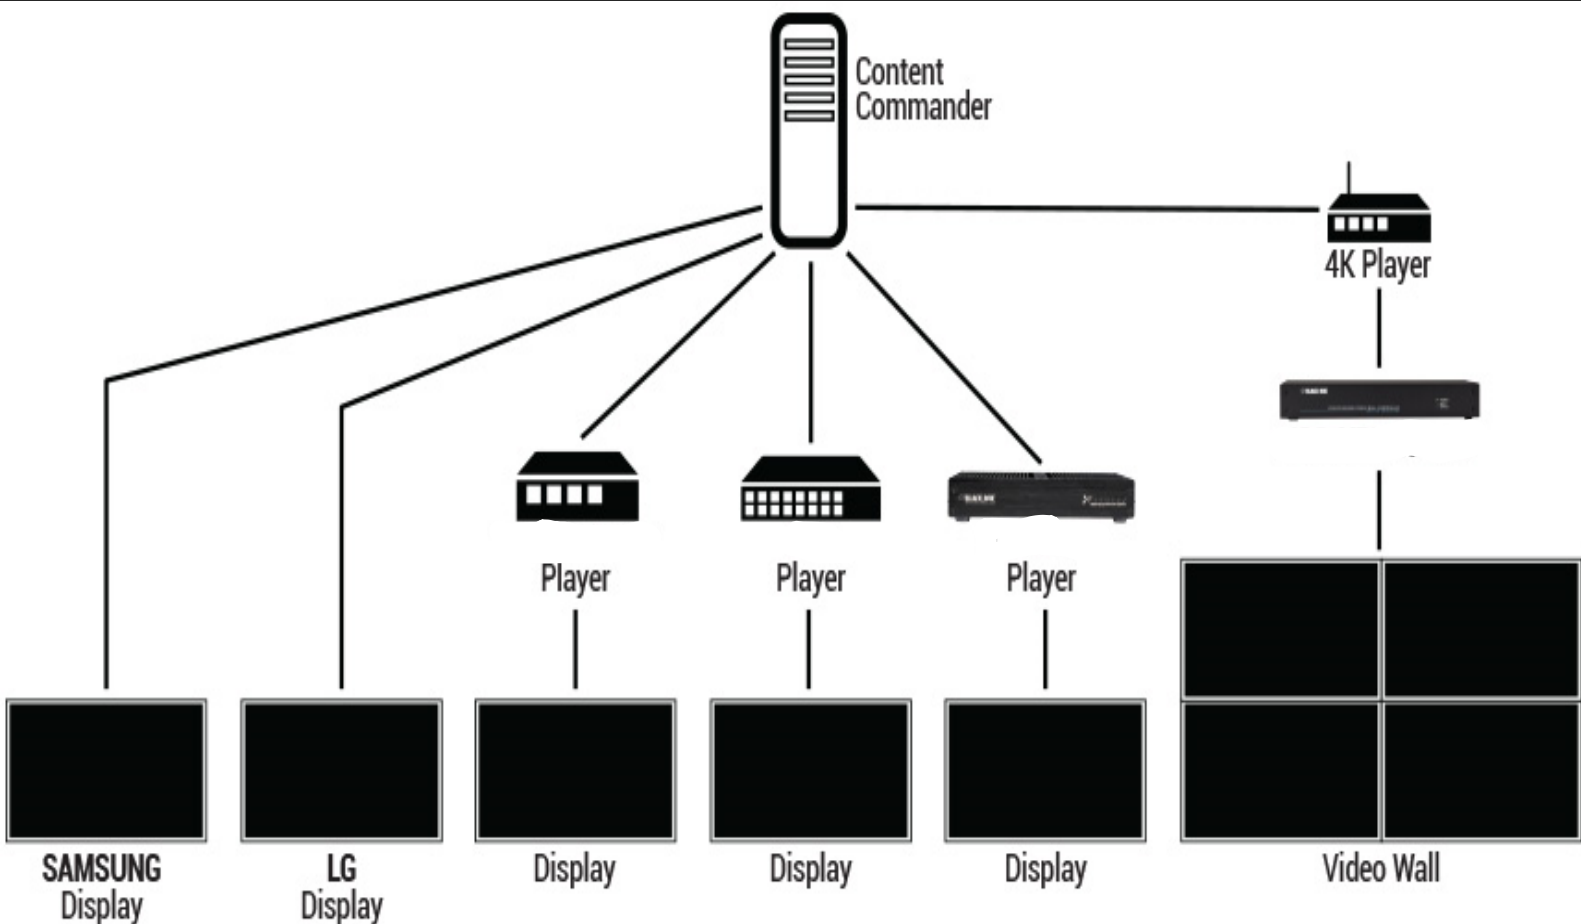

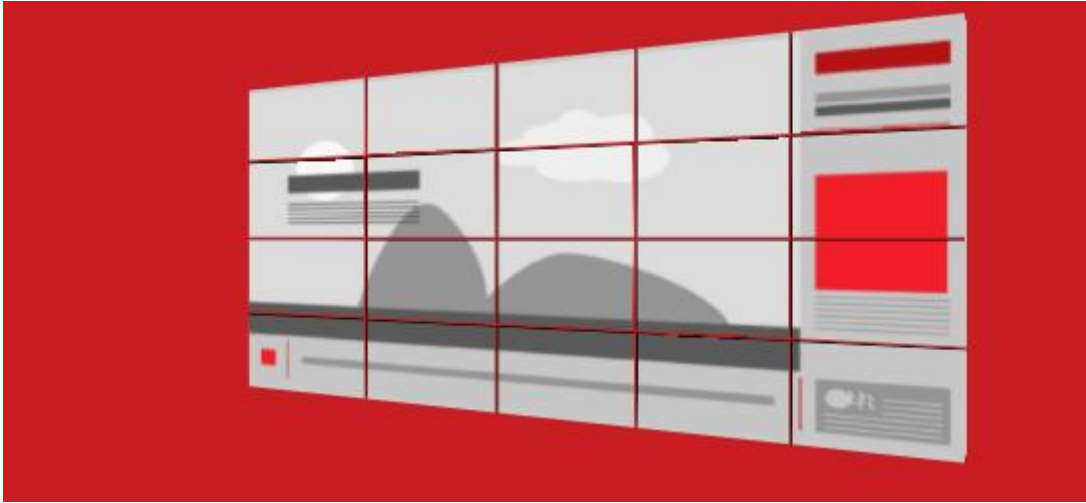

Planning a digital signage project is hard work and entails a lot of planning. If you are considering deploying a new system or updating an existing one, you should ask yourself the following questions prior to making a decision:

- What type of information do you want to display?
- Do you want to stream static or dynamic content including multiple multimedia formats (photos, HTML, video, RSS feeds)?
- Which video interfaces need to be supported?
- How many locations and displays do you want the content to run on?
- Do you want to share content on one screen or multiple screens, in one location or multiple locations?
- How do you want to centrally, remotely manage your content?
- Do you need remote-control features to poll the detailed player status, control screens and volume, reboot players and deploy software upgrades?
- Do you need system log and content reporting?

ABOUT US

Vinformatics has provided clients with innovative digital signage solutions that far exceed industry standards. We maintain digital signage solutions for more than hundreds of clients, representing a variety of industries. The VINFORMATICS One System, One Call philosophy provides clients with complete turnkey digital signage solutions and ensures we remain the premier provider of digital signage networks.

VINFORMATICS

WE COME TOGETHER AS A TEAM TO ACHIEVE A COMMON GOAL

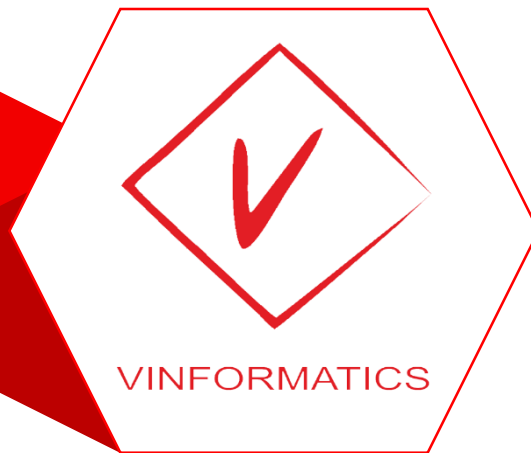

We have a team comprising of creative, technically sound, and experienced professionals. They are well informed on the latest digital signage solutions and also the hardware and solutions used for putting up an effective digital signage system. They keep a track of the newest market trends and innovative solutions to recommend the best package to each client based on their requirement.

The leaders, partners and employees of Vinformatics evolve in a working atmosphere which is very dynamic and enriching where the human being is always considered first. It is an environment that helps develop both professional and personal qualities in a very harmonious collaboration.

Our success depends on finding the best people and bringing them together to serve consumer needs. “VINFORMATICS” has a dedicated team of highly skilled professionals who are passionate about delivering the company’s strategy. In a supportive environment, our employees are motivated through performance management systems, and recognition approaches that reward employee contributions. Engaging, enabling and retaining our valued employees is critical in maintaining the quality of our products and laying a foundation for future growth.

WE are not a team because we work together. We are a team because we respect , trust and Care for each other

OUR PROCESS

There's a simple reason that customers choose VINFORMATICS service again and again. Trust Tradition signage. Digital signage. 2D. 3D.... Whatever your signage needs, VINFORMATICS has years of experience in delivering superb results. We deliver on time, every time. Once you decide to work with us, our designated project manager will work beside you throughout the whole process. This single point of contact provides a coordinated approach and smooth transition through every stage of production, ensuring demands and deadlines are met from concept to completion.

Find out more about our 4-step approach...

1. Site Survey.

Once you've decided to work with VINFORMATICS on your project, we don't leave anything to chance. We'll start with a full signage site survey visit to get a thorough understanding of your needs, from the location and environment through to every detail of what you'd like your new signage to achieve.

2. Signage Design.

If you get the process wrong, getting the right design can be a frustrating task. But not with vinformatics. Our experienced designers have bags of specialist signage design experience working on a variety of platforms and can take on any challenge

3. Signage Installation.

Wherever. Whenever. We'll be there. Our workforce is fully qualified and first aid trained, enabling them to work in an array of locations and conditions. They understand how to liaise with different trades and often work alongside other contractors.

4. Signage Maintenance.

Ensuring a long-lasting relationship. Once you're sign is installed, don't worry, we're not going anywhere. We will always propose a suitable maintenance plan based on the nature of the signage and installation and put forward a recommendation to integrate it within any overall programme of works.

VINFORMATICS

OUR SERVICES

operational services

From network strategy to content creation and playlist management, Capital Networks can effectively take on operations of your new or current digital signage deployment by providing consultation, production and support services that will enhance performance and maximize investment.

consultation

Whether you're in the project planning stage or looking to enhance an existing installation, our sales, production and support teams are always available to offer expert advice regarding everything from optimal system configuration to advanced scheduling options and high impact, custom show designs.

production & creative services

From custom content creation to complete show design, we're able to provide you with full-service solutions. Whether you want us to work with your creative team, your advertising agency or provide a complete turnkey product, our team of dedicated, creative professionals is here to help.

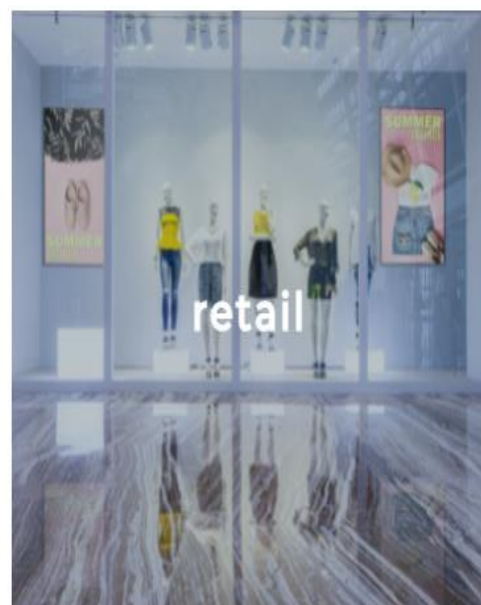

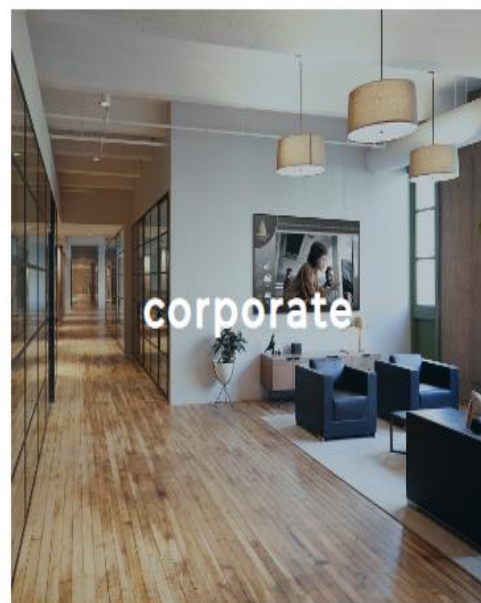

personalized training

Operations, production and technical training sessions are run online, at your location or out of our Markham, Ontario headquarters. Class sizes are kept small to ensure that trainees receive a focused, hands-on experience and sessions are customized to meet the needs of your specific project.

DIRECTOR'S STATEMENT

We believe a business is not successful if it is only committed to profit. It has to be an activity which creates prosperity and well being for all those who are connected with it directly or indirectly. Profit is only a by-product reflecting how well we are carrying out the business activity.

Our commitment, firstly, is to the Customers we serve as we are in business because of them. As a LG's Partner, it is our aim to bring our Customers a quality product which is reliable and is best suited to Customers' job requirements. Subsequently, we must ensure that the product gives the Customers the kind of performance and productivity that will enable our Customers to realize the full value of money paid. Our relationship with the Customers does not end with a sale but a journey just starts with it. It is to this end that Vinformatics has developed its network across The Country. The underlying approach has always been to have a dealership which is well organized to deliver world class Customer support in line with the current and changing needs of the country. I believe, only a talented group of people can bring in delight in Customers' minds and to this effect, we give an excellent work environment in Vinformatics to our staff, nurturing and developing their talents continuously, to deliver the Best in Class support to our Customers.

Today, Saudi Arabia is striving towards progress and development. We are closely associated in supplying LG products and delivering Vinformatics Customer Support Services for the country's various developmental activities like Health Sectors, Municipal Sectors, Education Sectors, Hospitality & Many others

"Vinformatics and LG, together as partners, continue to progress in this changing landscape of Saudi Arabia."
